

We care about your health!

Cleanliness and safety is our primary concern at Piller Child Development.

We are diligent about our cleaning procedures in all offices. A professional cleaning crew cleans the office every evening. We also have a designated employee who disinfects all equipment, toys, supplies, and furniture on a regular basis. We follow all guidelines for cleaning and sanitizing equipment from the AZ Department of Health and other governing agencies. Therapists and staff are all trained in infection control, universal precautions, hand washing, and disinfectant procedures. All staff practice good hygiene on a regular basis, and we encourage staff and clients to stay home should they be feeling ill.

All information and procedures regarding the current outbreak of COVID-19 are under the guidelines of the AZ Department of Health and Human Services and the Center for Disease Control.

Should you have any questions regarding the procedures at Piller Child Development, please contact our office manager, **Daphney Hendrix**, at **daphney.Hendrix@PillerChildDevelopment.com**
